

MAG 2700 VERTICAL SHAFT IMPACTOR

The 2700 Vertical Shaft Impact Crusher from Magotteaux establishes unequalled standards in the area of gravels and crushed sands. The fully mobile treatment system combines the well proven GIPO combined installation, feeding unit and integrated oversize feedback with a Magotteaux Vertical Shaft impactor: MAG'Impact.

With this combined installation you can crush and shape in one pass saving you the use of the two 4ft cone and a VSI. With exceptional wear rates and screen attachment, this low maintenance unit guarantees lower costs per tonne, a revolution in crushing.

FEATURES & BENEFITS

- Swiss quality
- Fully-hydraulic propulsion for continuous setting of the rotor rotation speed
- Multiple classified final particle sizes with one system
- The most modern technology, high mobility, small site footprint with minimum time needed for preparation
- Unsurpassed in performance, best particle quality
- Maintenance and service friendly
- Remote control for driving and feed channel
- Diesel refueling pump 50l/min
- Single or double deck screen optional
- Crusher deliver case with hardox lining

POWERPACK

Drive	Diesel/Hydraulic
Type	CAT C18
Power	563kW @2000rpm
Cooling	Water Cooled

CRUSHER

Type	Mag Impact 2700 VSI
Rotor	4 bar rotor

FEED HOPPER

Volume	5m ³
Hydraulic folding side walls	
1200mm wide feed channel	
Remote control for feed Channel	

CONVEYORS

Main Discharge Conveyor	
12000mm x 1600mm	
Hydraulic folding	

TRACKS

Chain Tracks D7
